Procurement Department

ADDENDUM # 4

To: 110-920-46-3559
RFP for: JDE Upgrade

The following question has been asked:

Question 1: As we build our response, we are conflicted in how to price and bid appropriately. The real basic question is a technical, as-is upgrade versus a full upgrade that includes gap analysis, assessment, and business process review. In the pre bid call your Procurement Director was adamant about just a technical upgrade however the RFP clearly contradicts this. Formally, what would you like us to do? We can approach either way.

In the addendum and RFP you talk about a technical only migration although in Section 3.6 and refer to a Technical and Functional Audit with a lot of business process review and net change review. You are also looking for a feasibility study during this RFP. This looks like complete upgrade with analysis of business process changes. Can you clarify what you are really looking for?

Answer 1: This project should proceed as "a full upgrade that includes gap analysis, assessment, and business process review."
